ADMIRAL 75

Admiral 75 is a 75-metre superyacht constructed in steel and aluminium, designed with a focus on functionality, efficient layout, and contemporary naval architecture. With a gross tonnage of 1,600 GT, she offers expansive volume and cleverly organized living spaces.

A standout feature of the **Admiral 75** is the inclusion of two full-beam master suites — a rare and innovative layout choice for a yacht of this size, offering unmatched privacy and flexibility in guest accommodation.

The lower deck integrates the guest staterooms with a beach club, where fold-out terraces at the waterline expand the area and provide seamless sea access. This wellness-focused space features a gym, sauna, and spa lounge, creating a dedicated retreat for relaxation and fitness.

Outdoor living is a central theme across the yacht's design, with a pool on the main aft deck and two Jacuzzis — one on the upper deck and another forward. The exterior decks are arranged to encourage both social interaction and quiet escape, with ample lounging and dining areas.

One of the yacht's most notable engineering features is its single-level engine room, positioned below the guest accommodations. This arrangement optimizes the internal layout and maximizes guest comfort while enhancing operational efficiency. Powered by a diesel-electric propulsion system, **Admiral 75** offers a transoceanic range of up to 6,000 nautical miles at an economical speed of 10 knots. At-anchor and underway stabilizers ensure a smooth experience in all sea conditions.

She accommodates up to 14 guests in seven staterooms, supported by a professional crew of 20. Based on the proven **ADM 66** platform, **Admiral 75** is available for custom build with a delivery time of 48 months.

This model is tailored for forward-thinking owners who value intelligent design, technical sophistication, and long-range autonomy without compromising on luxury.
