## VIPER 130

**ISA Viper 130** is a 38.8-metre semi-displacement superyacht defined by her sleek, aggressive styling and dynamic performance. Designed by **Fulvio De Simoni**, she features a lightweight composite hull with carbon fibre elements, ensuring strength, efficiency, and a striking silhouette. Powered by three MAN V12X-2200 engines (with optional MTU configuration), she reaches a thrilling top speed of 35 knots and cruises effortlessly at 30 knots. Her shallow draft of just 1.55 metres makes her ideal for exploring shallow cruising grounds such as the Bahamas and the Caribbean. Outdoor living is a central focus, with three fluidly connected open-air zones. A beach club at water level features a convertible system that doubles as a swim platform and boarding staircase. The main deck lounge offers ample seating and folding balconies to port and starboard, expanding the sense of openness. Forward, a formal dining area for eight is paired with a bar and open galley, ideal for relaxed meals or live cooking presentations. If needed, this space can be separated from the lounge by a tinted glass partition.

Circulation is thoughtfully arranged with port-side access to the foredeck, where guests will find a generous lounge area with a round pool, sunpads, and seating. A midship balcony adjacent to the main salon allows sea views even from within. Accommodation is provided for up to 10 guests in five cabins. The owner's suite can be configured amidships to take full advantage of the yacht's beam, or forward with a private dressing room and dual bathrooms. Four guest cabins are located on the lower deck, while a crew of five is housed in three separate cabins for discreet, high-level service.

With its blend of high performance, smart space planning, and contemporary elegance, **ISA Viper 130** is tailored for owners seeking an active cruising experience with comfort, privacy, and bold Italian design.
