## A85

**Arcadia A85** is a 26-metre motor yacht that blends comfort, efficiency, and sustainability in a uniquely contemporary design. One of the model's most distinctive features is its glass-enclosed superstructure with double glazing, functioning like a winter garden to fill the interior with natural light and create a seamless connection between indoor living and the surrounding seascape.

The yacht's hull is constructed from fibreglass, while the aluminium superstructure contributes to reduced weight and fuel consumption. The semi-displacement hull ensures smooth cruising and stability, even in choppy waters. Over 40 square metres of solar panels generate approximately 4.5 kW of power, supplying key onboard systems without relying on generators - an environmentally conscious approach to luxury cruising.

With a beam of 7.14 metres, the **A85** offers unusually generous outdoor spaces. The aft deck spans about 100 square metres, providing a wide, open area for socialising and dining. The master suite alone covers 32 square metres - exceptionally large for a yacht of this size.

Accommodation includes four guest cabins for up to eight guests, and two crew cabins for four. The layout is carefully designed for privacy and comfort, with a clean, modern interior that incorporates natural materials and a soft, neutral colour palette.

Powered by twin MAN I6 engines rated at 800 hp each, the **Arcadia A85** cruises efficiently at 14 knots and reaches a top speed of 17 knots. Her range at cruising speed is around 660 nautical miles. Thanks to her low fuel consumption and reduced onboard noise levels, she offers a relaxed and eco-minded cruising experience. Currently located in Marina di Stabia and fully ready for sea trials, **Arcadia A85** stands as a forward-thinking alternative to traditional motor yachts - ideal for owners seeking harmony between luxury, practicality, and sustainability.
