MOTOR YACHT

PROJECT FUN

PROJECT FUN is a 49.5-meter custom motor yacht currently under construction at **Feadship**, with delivery scheduled for March 2026. Built entirely in aluminium and engineered with a diesel-electric propulsion system and Schottel thrusters, the yacht offers exceptional fuel efficiency, minimal vibration, and quiet operation. Compatible with HVO fuel and fully compliant with IMO Tier III standards, she represents the latest in environmentally conscious superyacht design.

Her sleek exterior is the work of De Voogt Naval Architects, while the interior was created by Marty Lowe Design to evoke a warm, organic atmosphere. A carefully chosen palette of natural materials and textures, paired with panoramic windows and thoughtfully planned lighting, gives the interior a sense of openness and calm. The main deck features a spacious saloon that blends lounge and dining areas, flowing effortlessly out to the aft deck, where guests will find a Jacuzzi, alfresco dining space, and fold-down balconies that transform into a beach club right at the water's edge.

Accommodation is provided for up to ten guests across five cabins, including a full-beam owner's suite with panoramic views, a private study, and a serene ensuite bathroom. Four guest cabins on the lower deck offer privacy and comfort, while the crew quarters are laid out for eight staff, including a separate captain's cabin, and include direct access to service areas to ensure smooth operation.

The yacht's outdoor decks are designed for both active living and total relaxation. The sun deck offers a bar, barbecue, large sunpads, and an open-air cinema screen, while the aft swim platform allows easy access to the water. For extended cruising, **PROJECT FUN** offers a top speed of 15 knots, a cruising speed of 12 knots, and a range of up to 4,000 nautical miles. Underway, onboard noise levels remain remarkably low - between 42 and 56 decibels - ensuring a tranquil experience at sea.

Currently in the advanced stages of construction, the hull and superstructure are complete, primary systems are installed, and outfitting is well underway. Launch is expected in November 2025, with delivery in early 2026.

PROJECT FUN presents a rare opportunity to acquire a new-generation **Feadship** of under 50 meters without the extended lead time. With its contemporary styling, low environmental footprint, and refined living spaces, it offers an ideal blend of innovation, luxury, and comfort for discerning owners.
