BIANCINO 3

BIANCINO 3 is the first hull of the 19.2-metre **Tecnomar** for **Lamborghini 63**, created through a collaboration between **Tecnomar** and Automobili **Lamborghini**. This exclusive model unites cutting-edge technology, high performance, and Italian automotive aesthetics, embodying the philosophy of speed, innovation, and style. The entire hull is built from carbon fiber, resulting in a remarkably light displacement of just 42 tons. Powered by twin MAN V12 engines of 2000 hp each, **BIANCINO 3** reaches an impressive top speed of 63 knots, making it one of the fastest yachts in its class.

The exterior, designed by **Tecnomar Centro Stile** in collaboration with **Lamborghini**, draws inspiration from the legendary Miura and Countach models. Its sharp lines, aerodynamic silhouette, and aggressive contours emphasize the yacht's supercar DNA.

The interior merges advanced technology with refined comfort. Crafted with premium Italian materials and innovative finishes, it features two guest cabins — a VIP suite and a twin cabin — accommodating up to four guests overnight and up to twelve guests for day cruises.

Outdoor spaces include sunbathing and relaxation areas, while the cockpit and open decks are designed for maximum comfort and safety even at high speeds.

BIANCINO 3 represents the fusion of **Lamborghini** performance and **Tecnomar** engineering, a striking symbol of modern Italian luxury and design excellence on the water.
