# LAMBORGHINI 101

**Tecnomar for Lamborghini 101** is a 31-metre yacht created in a collaboration between **Lamborghini** and **The Italian Sea Group**. Building on the concept of the Tecnomar 63 and scaling it to full superyacht dimensions, the 101 retains the unmistakable design language of the brand while introducing a new level of space and presence on the water. The aluminium hull and superstructure form a lightweight yet remarkably strong platform, echoing the engineering approach of **Lamborghini's** performance vehicles.

The yacht is powered by three MTU 16V 2000 M96L engines, delivering a combined output of 7,600 hp and working in tandem with Top System surface drives and Rolla propellers. This configuration allows the 101 to reach a top speed of around 45 knots and maintain a fast 35-knot cruising speed. Despite its scale, the yacht remains highly responsive, benefiting from an optimised hull shape, shallow draft and fully synchronised trim and control systems. Onboard systems are supported by two 35 kW generators.

The interior reflects the aesthetic philosophy of **Lamborghini** supercars, characterised by sharp geometry, sculptural forms and distinct accent details. All interior configurations and finishes are fully customisable, allowing owners to tailor the yacht to their personal style. With its expanded dimensions, the 101FT offers significantly larger living areas while maintaining a sporty, performance-forward character. Accommodation includes an owner's suite, two VIP cabins and one guest cabin, all on the lower deck and each with its own ensuite. Crew quarters are positioned forward, comprising two cabins with separate bathrooms.

Produced as a limited-series yacht, **Tecnomar for Lamborghini 101** stands as a statement vessel for owners who seek a fusion of uncompromising speed, iconic automotive design and the elevated comfort expected of a modern superyacht.
