## LYDIA

**Sanlorenzo SX88 LYDIA**, delivered to her owner in 2020, represents one of the most functionally advanced configurations within the **SX** line. The superstructure is positioned forward, allowing for an expansive open aft deck - a defining architectural feature that integrates tender stowage, launching operations and a generous lounge area into one cohesive space.

The main deck is conceived as a fully open environment, where the salon, dining area and forward lounge connect seamlessly without changes in level. The primary helm station has been moved to the flybridge, dedicating the entire main deck exclusively to guest living. Constructed in GRP, both the hull and superstructure benefit from a deep-V hull form combined with triple Volvo Penta IPS engines, offering efficient performance, responsive handling and speeds of up to 23 knots with a comfortable 20-knot cruise.

The lower deck accommodates eight guests in four cabins: a full-beam master, a VIP and two guest cabins. Crew quarters for three are located aft with a private entrance, ensuring complete separation between service and guest areas. **LYDIA's** interior has been customised extensively: a redesigned galley layout, expanded storage volumes, upgraded domestic appliances, integrated blackout systems, reinforced finishing materials, enhanced sound insulation, and improved furniture engineering. Several cabins also feature lift-up bed mechanisms.

Technical equipment includes zero-speed stabilisers, an upgraded Raymarine navigation suite with monitoring and CCTV, two generators, an Idromar watermaker, a lithium-ion battery bank for auxiliary power, and a Gold-level integrated AV network. Additional features comprise enhanced lighting, expanded electrical capacity, an updated Wi-Fi architecture, pre-installation for name lighting and an extended set of media options.

The water-toys inventory includes a Williams SportJet 435 tender, a Sea-Doo RXT-X 300 jetski, and two Seabob F5S units with charging stations and dedicated storage mounts.

**SX88 LYDIA** is designed for active use and extended stays on board. Her optimised architecture, refined ergonomics, comprehensive technical specification and bespoke interior configuration position her as one of the strongest offerings in the **SX88** segment.
