MOTOR YACHT

GTX70

Pershing GTX70 is the most compact model in the Sport Utility Yacht range, combining **Pershing's** signature performance with increased volume and a strong focus on life close to the water. With an overall length of 21.76 metres and a beam of 5.42 metres, she delivers interior and exterior spaces comparable to larger yachts, while remaining highly manoeuvrable and easy to handle. The project was developed by Ferretti Group in collaboration with Vallicelli Design and the shipyard's engineering team.

The architecture of the **GTX70** is centred around maximising usable space. The two-level aft area forms a true beach club with direct access to the sea: the lower level can be expanded via folding side terraces, while the swim platform functions both as a launch point for a tender or jet ski and as a seamless extension of the beach area. The main deck benefits from increased beam and a direct connection between the saloon and the outdoor spaces, creating an open, continuous living environment. Accommodation is arranged for six guests in three cabins. A sportbridge complements the layout, adding an additional open-air area for relaxation and sunbathing.

The **Pershing GTX70** is designed for owners seeking a compact yet expressive yacht, with a well-developed beach area, bold styling and the unmistakable performance and character that define the **Pershing** brand.
