SEADECK 6

Azimut Seadeck 6 is the entry-level model of **Azimut's** hybrid **Seadeck** series, conceived with a strong focus on efficiency, sustainability, and a direct connection to the sea. Its planing hull, combined with hybrid technologies and optimized architecture, reduces fuel consumption and emissions by up to 40% compared to conventional yachts of similar size, while maintaining the performance and comfort expected for everyday cruising.

The core of the concept is the aft Fun Island area - a reimagined waterside space designed for social life on board. Fold-down side terraces and a wide swim platform with integrated steps extend the main deck and create an open, versatile zone for swimming, relaxation, and socializing. In the Sundeck version, the yacht is further enhanced by an open flybridge, adding an additional outdoor living area.

Interiors by Matteo Thun and Antonio Rodriguez are based on the idea of "conscious comfort": natural materials, soft transitions between spaces, and an abundance of light and air create a calm, spacious atmosphere without excessive decoration.

The lower deck accommodates three guest cabins for six guests, along with a separate crew cabin. At approximately 17.25 meters in length, the **Azimut Seadeck 6** delivers a well-balanced layout, functional volumes, and a contemporary interpretation of yachting, where technology and design work together to enhance comfort and enjoyment on the water.
