## FLY 82

**Azimut Fly 82** is a 24.79-metre motor yacht designed for extended cruising, with a clear separation of living areas and a high level of onboard privacy. The exterior styling by Alberto Mancini preserves the dynamic proportions of the **Fly** series, conveying a sense of motion even at anchor. The GRP hull, incorporating carbon fibre elements, optimises structural weight and enhances overall efficiency. A key architectural feature is **Azimut's Deck2Deck™** system, which transforms the aft section into an open waterside terrace. The lifting transom increases the usable cockpit area and creates a direct connection to the sea, significantly expanding the functionality of the aft zone for relaxation and swimming. The interior, designed by Fabio Fantolino, is defined by a refined balance of textures and tones, with an emphasis on practicality and visual harmony. The main saloon is conceived as a dedicated space for socialising and entertaining, with well-defined zones that preserve a strong sense of volume. The layout accommodates up to eight guests in four cabins, all with en-suite bathrooms. Crew quarters are arranged separately, ensuring discreet service and enhanced comfort for guests. The flybridge features sunbathing areas, an outdoor dining space and a helm station. Propulsion is provided by three Volvo Penta IPS 1200 engines rated at 900 hp each, with an option to upgrade to IPS 1350, delivering a top speed of up to 32 knots and a cruising speed of around 25 knots. CE Category A certification confirms the yacht's capability for operation in open-sea conditions.
