## ANTIOXIDANT

**ANTIOXIDANT** is a 2017 **Riva 88 Domino Super**, a high-performance sport yacht designed by Officina Italiana Design and instantly recognisable for her sleek, aggressive profile. The GRP hull is finished in **Riva's** signature London Grey, contrasted by a Moon Grey superstructure, a combination that accentuates the yacht's elongated lines and dynamic stance. Teak decks and Awlgrip exterior finishes complete the refined yet purposeful aesthetic. Extensive hull glazing runs from the mid-section forward, flooding the interior with natural light and reinforcing the yacht's modern, open feel. The layout accommodates up to eight guests in four en-suite cabins, while two separate crew cabins for up to four crew members, with independent access, ensure discreet and efficient service. The interior design follows a contemporary, functional approach, prioritising usability and comfort without unnecessary ornamentation. Power comes from twin MTU 16V 2000 M94 engines, each producing 2,638 hp, delivering a cruising speed of around 32 knots and a top speed of up to 40 knots. In 2024, the yacht benefited from significant updates to the upper deck and aft areas. The flybridge was enlarged and the exterior helm repositioned centrally, freeing the forward section to create a dedicated lounge area. The aft zone was further optimised for everyday operation and technical access, while maintaining a seamless connection to the outdoor relaxation spaces.

**Riva 88 Domino Super ANTIOXIDANT** is a true expression of **Riva's** sporting DNA - a fast, elegant motor yacht designed for dynamic cruising, contemporary onboard living, and the unmistakable style that defines the brand.
