MOTOR YACHT

B30

BLAUNDUS B30 is a 30-metre expedition motor yacht designed for long-range autonomous cruising, reliable operation in demanding conditions, and comfortable life on board. She features a steel hull with an aluminium superstructure, a full displacement of approximately 220 tonnes, gross tonnage of around 290 GT, and a loaded draft of about 2.25 metres.

The interior layout includes six cabins for the owner and guests, among them a full-beam master suite of approximately 28 square metres with a private lobby, a VIP cabin located on the upper deck, and four additional guest cabins. Crew accommodation is arranged separately and includes a dedicated captain's cabin, with space for up to five crew members, allowing for professional service during extended voyages.

Outdoor areas are distributed across three decks. The upper deck offers around 65 square metres of usable space for relaxation and socialising, while the aft section features a beach club of approximately 22 square metres with direct access to the water. All exterior decks are finished in teak and designed for practical, durable use during long passages.

Propulsion is provided by twin MAN D2676 LE245 diesel engines, each producing 650 hp and coupled to ZF gearboxes. The yacht cruises comfortably at 9–10 knots, reaches a maximum speed of up to 13.5 knots, and offers an impressive range of approximately 4,500 nautical miles at economical speed, making her suitable for intercontinental routes.

Electrical power is supplied by two Kohler generators, while harbour manoeuvring is assisted by a hydraulic bow thruster. Fuel capacity is approximately 27 cubic metres, with fresh water capacity of around 6.6 cubic metres, complemented by dedicated holding tanks in line with the requirements of long-term autonomous operation.

BLAUNDUS B30 is a true expedition motor yacht, combining a robust steel construction, substantial range, and a rational, well-balanced layout, ideally suited for owners seeking extended, independent ocean voyages.
