PROJECT MILKY WAYS

Project Milky Ways is a 50-meter motor yacht currently under construction by **MCP Yachts** in Brazil, with a scheduled delivery in 2027. The yacht is designed in collaboration with **Vripack** and is intended for long voyages, with a cruising speed of 15 knots and a maximum range of 3,500 nautical miles at 11 knots.

Project Milky Ways can accommodate up to 12 guests in 5 cabins, including a full-beam master suite on the main deck, two VIP cabins, and two convertible cabins with twin single beds. Additionally, there are separate cabins for 10 crew members, ensuring optimal service and privacy for guests.

One of the unique features of the yacht is the "people pad"- a terrace above the water that serves as a separate lounge area with a two-sided bar, creating the perfect space for relaxation and entertainment on the aft deck.

Project Milky Ways is equipped with a beach club, sauna, fitness area, and an expanded swimming pool, offering all the amenities for leisure. The lower deck includes two side terraces, increasing the relaxation space when lowered. The bridge deck features a helipad for an Airbus EC145, which can also be used as a basketball court when the helicopter is not in use. For convenience, there is also a hidden garage for a tender with a 7-meter Castoldi tender.

The yacht also includes two office spaces: the main office for the owner on the upper deck next to the sky lounge and a smaller office near the master suite. Additional features include a cigar lounge with a folding balcony and a wine cellar that holds up to 250 bottles.
