## BGF45

The **BGF45** is a 14.15-meter motor catamaran designed by **Bluegame** in collaboration with America's Cup, incorporating technologies used on the hydrogen-powered chase boat BGH. The yacht combines high performance, efficiency, and comfort, integrating a foil system between the two hulls to reduce hydrodynamic resistance and save up to 30% on fuel.

Equipped with two Volvo Penta IPS 600 D6 engines, each delivering 320 kW, the yacht reaches a top speed of 35 knots and cruises comfortably at 28 knots. The foil configuration ensures a smooth and stable ride even at high speeds, providing guests with exceptional comfort.

With a width of 5.12 meters and a draft of 1.15 meters, the **BGF45** offers spacious decks and three cabins, which is unusual for yachts of this size. The layout includes two main cabins and a flexible additional cabin, making it suitable for both overnight cruises and day trips. The exterior spaces feature a large forward lounge area and a beach zone with direct access to the sea.
