WALLYPOWER58X

Wallypower58X - a motor yacht measuring 17.4 meters, combining exhilarating performance and the elegant Wally design. Built on the revolutionary **Wallypower58** platform, this yacht is equipped with four Mercury V12 Verado engines, each delivering 600 hp, for a total of 2,400 hp. This powerful setup allows for a top speed of 50 knots with low fuel consumption and a range of 320 nautical miles at a cruising speed of 38 knots.

The yacht features a deep V-hull, ensuring stability and excellent efficiency at high speeds. The Mercury Verado engines with a shallower draft are perfect for cruising in shallow waters, while the rotating gearboxes and joystick-controlled steering provide precise maneuvering when docking, even in confined spaces.

The **Wallypower 58X** comes standard with folding terraces, which expand the aft area and maintain the spacious layout, despite the use of outboard engines. A hydraulic gangway allows for safe and easy access to the water, a feature first introduced on the **Wallypower 48X** and later on the **43X**.

The absence of inboard engines increases storage capacity, making the yacht ideal for long cruises or day trips. It can accommodate up to 12 guests on day cruises, offering comfortable space for one or two couples.

The **Wallypower58X** is classified by B + F RINA S.p.A., confirming it meets the highest maritime safety standards. The **Wallypower58X** is the perfect combination of speed, comfort, and innovative design.
