ROCK X

ROCK X is a 27-meter expedition yacht featuring a steel hull and aluminum superstructure, built by **Evadne Yachts** in 2025 to a design by Vripack. Delivered as a 150 GT super-displacement platform, she is ready for immediate handover and engineered for long-range cruising with enhanced interior volume. With a 6.5 m beam, 1.8 m draft, and a full-load displacement of approximately 110 tonnes, **ROCK X** combines transoceanic capability with access to relatively shallow waters.

The yacht accommodates up to 8 guests in 4 cabins and 4 crew members in 2 crew cabins. The full-beam owner's suite is located on the main deck and features floor-to-ceiling panoramic windows and a fold-out balcony with integrated lighting. On the lower deck, three guest cabins - one double and two twins - each offer en-suite facilities. In total, there are five guest bathrooms and two crew bathrooms.

The main saloon, surrounded by panoramic glazing, includes a lounge area with flexible, movable furniture, a mini-bar, and a dining area for up to 12 guests. The flybridge, approximately 15 m², is designed for open-air relaxation and dining, while additional shaded seating areas are positioned on the aft main deck.

At the stern, an integrated beach club with Jacuzzi connects to a multifunctional swim platform capable of carrying a tender up to 6.5 meters. When the tender is deployed, the platform transforms into an extended waterside leisure area. The yacht is equipped with Humphree electric stabilizers, an aft docking station, a flybridge helm, and a 500 kg capacity crane on the flybridge.

ROCK X complies with CE Category A standards. With a registered length under 24 meters according to European classification rules, she delivers interior and exterior volumes comparable to significantly larger yachts.
