MOTOR YACHT

KING POWER

The motor yacht **KING POWER**, built by **Sunseeker** in 2016, belongs to the 35-meter class and has been privately used since delivery, with no charter history. She is powered by twin MTU 16V 2000 M96L engines (2016), each with approximately 1,030 running hours as of November 2025. Since new, **KING POWER** has been maintained by the same professional crew, contributing to her excellent technical condition and overall preservation.

On board, the yacht is equipped with twin Kohler 70 kW generators (approximately 1,616 hours each), as well as bow and stern thrusters by Sleipner and a stabilization system for enhanced comfort underway and at anchor. Additional systems include watermakers, a wastewater treatment system, and a tropical-grade air conditioning system, with dedicated climate control for the engine room.

The layout accommodates up to 10 guests across five cabins, including a full-beam master suite on the main deck and four guest cabins below, each with en-suite facilities. In total, there are six bathrooms on board. Crew quarters are fully separated and consist of three cabins for up to five crew members, including a captain's cabin, along with dedicated crew service areas.

Both interior and exterior spaces are designed with an emphasis on comfort and functionality. Generous lounge areas, a flybridge with a hardtop, and a well-thought-out deck arrangement ensure ease of use and a relaxed onboard experience for both owner and guests.

KING POWER is built to RINA classification and complies with MCA LY3 standards, allowing for both private ownership and potential commercial operation if required. Her current condition reflects consistent maintenance, careful ownership, and light usage. **KING POWER** is fully operational and ready for immediate use, with no additional investment required.
