MOTOR YACHT

NANGARA

The motor yacht **NANGARA**, built by **Sanlorenzo** in 2024, is part of the **SL106 Asymmetric** range - a modern 32-meter yacht defined by innovative spatial architecture and a high level of customization. Designed for a single owner, she features an extensive options package and bespoke interior finishes. A key highlight of the model is her asymmetric layout, which increases interior volume and creates a more seamless connection between indoor and outdoor living areas.

The layout accommodates up to 10 guests across five cabins. The spacious master suite is located on the main deck, offering a high level of privacy. The lower deck features three double cabins and one twin cabin with convertible configuration. Crew quarters are arranged in three cabins with dedicated service areas, ensuring efficient operation and guest privacy.

The interiors are styled in a contemporary aesthetic, with carefully selected materials and custom design elements. Spaces are thoughtfully arranged for comfortable long-term stays on board, balancing elegance with functionality.

The flybridge and exterior decks are designed for both relaxation and entertaining, offering multiple lounge and alfresco dining areas.

NANGARA is fully equipped and ready for operation, combining advanced technical specifications, bespoke finishes, and modern design - equally suited for private ownership or commercial use.
