# STRADIVARIUS

The motor yacht **STRADIVARIUS**, built by **Sanlorenzo** in 2023, is part of the **SX112** range - a modern 34-meter yacht that combines innovative architecture, high levels of comfort, and a strong connection to the sea.

She is powered by four Volvo IPS3 1350SD diesel engines, each delivering 1,000 hp. This configuration allows for a top speed of 22 knots and a cruising speed of around 10 knots, with a range of up to 1,600 nautical miles. The IPS system ensures reduced noise and vibration, enhanced maneuverability, and excellent fuel efficiency. The layout accommodates up to 10 guests across five cabins. The spacious master suite is located forward on the main deck and features panoramic glazing. The lower deck hosts three VIP cabins and one convertible cabin, which can also be used as an additional lounge area if required. Crew quarters are arranged across three cabins.

**STRADIVARIUS** is designed with a strong focus on seamless integration with the sea. The aft area is configured as a full beach club with fold-down terraces, creating direct water access and expanding the space at sea level. This area includes fitness equipment, a day head, and a sauna, all positioned just above the waterline, with access from both the main and lower decks.

Outdoor areas feature a flybridge with a bar and lounge space, as well as an aft dining area on the main deck, ideal for alfresco dining.

The interiors are finished with high-quality materials and bespoke detailing, reflecting an enhanced specification and attention to detail. The yacht is equipped with advanced stabilization systems and battery solutions, allowing up to eight hours at anchor without running generators - significantly improving onboard comfort and reducing noise levels.

**STRADIVARIUS** is fully operational and ready for immediate use, offering a refined combination of innovative design, intelligent layout, and modern technology for efficient and comfortable cruising.
