MOTOR YACHT

SUN

SUN is a 35.5-metre semi-displacement motor yacht delivered in 2012 by **Arcadia Yachts**. Designed with a strong focus on energy efficiency and reduced environmental impact, she stands out for her integration of solar panels into the superstructure, allowing onboard systems to be powered at anchor while minimizing noise and fuel consumption.

Accommodation is arranged for up to 12 guests across five staterooms. The full-beam master suite is located on the main deck and features a workspace, walk-in wardrobe, and an en-suite bathroom with a Jacuzzi. Additional guest accommodation includes two double cabins and two twin cabins. Separate crew quarters for seven ensure a high level of service.

The main saloon combines lounge and dining areas within a bright, open space defined by full-height panoramic glazing, fold-down balconies, and an integrated multimedia system. The flybridge offers a lounge area, bar, and al fresco dining for up to 12 guests, along with an additional panoramic deck saloon. Forward, the yacht features a garage, sunbathing area, and a Jacuzzi.

Power is supplied by twin Kohler generators, with a 380V electrical system and shore power capability. Technical equipment includes air conditioning systems, an Idromar watermaker, Rodriquez stabilizers, a bow thruster, an Alfa Laval fuel filtration system, and a Gianneschi wastewater treatment system.

Configured for extended autonomous cruising, **SUN** offers a high level of onboard comfort while maintaining reduced operational impact and low noise levels.
