MOTOR YACHT

DW

DW is an **Anvera 58**, a 17.5-metre high-performance motor yacht built by **Anvera**. Constructed entirely from carbon fiber, she is engineered for maximum efficiency, reduced weight, and advanced hydrodynamics - delivering exceptional performance, fuel efficiency, and responsive handling.

Her concept is centered around open space and direct interaction with the sea. A defining feature is the fold-down side terraces, which significantly expand deck space and create a beach club-style environment. The layout includes generous sunbathing areas forward and aft, along with a cockpit offering flexible seating and dining configurations.

Powered by twin MAN I6-850 engines, **DW** achieves a cruising speed of approximately 40 knots and a top speed of up to 53 knots. The lightweight carbon construction enables rapid acceleration, precise maneuverability, and stable performance even at high speeds. With a range of around 333 nautical miles, she is equally suited for fast day trips and extended coastal cruising.

Interior accommodation is arranged for up to 4 guests across two cabins. The main cabin features a double bed, overhead glazing, and a lounge area, while the second cabin offers twin berths. A bathroom with a separate shower is also provided. The interior is finished in a light, contemporary style with integrated lighting and efficient use of space.

Onboard equipment includes a Seakeeper 6, air conditioning, a 9 kW Kohler generator, and a comprehensive Garmin navigation suite with radar, AIS, and autopilot. Additional features include Starlink connectivity, a Fusion audio system with JL speakers, a hydraulic swim ladder, gangway, and adaptable shading solutions.

Lightweight, fast, and architecturally distinctive, **DW** delivers a cutting-edge yachting experience - ideal for owners seeking performance, innovation, and a strong connection to the sea.
