VELOCITY

VELOCITY is one of the most compelling examples of the **Mangusta GranSport 54** series, delivered by **Overmarine Group** in 2020. Combining a top speed of 31 knots, a transoceanic range of approximately 4,200 nautical miles, accommodation for up to 16 guests and an internal volume of 497 GT, she occupies a unique position within the global 50-metre yacht market.

Built entirely in aluminium and designed throughout by Alberto Mancini, **VELOCITY** successfully bridges the gap between a high-performance sport yacht and a long-range cruising platform. Few yachts of this size are capable of delivering both exhilarating speed and true long-range capability, making her equally suited to fast-paced Mediterranean cruising and extended voyages further afield.

Her design philosophy focuses on combining efficiency, comfort and performance without compromise. The result is a yacht that offers the dynamic character for which Mangusta is renowned while providing the range, stability and onboard comfort typically associated with substantially larger displacement yachts.

Accommodation is arranged for up to 16 guests in 7 cabins, providing exceptional flexibility for both private ownership and charter operation. Generous exterior deck spaces and thoughtfully designed social areas create a variety of environments for relaxation, entertaining and outdoor living, allowing guests to enjoy different areas of the yacht throughout the day.

The extensive outdoor spaces complement a highly versatile layout, making **VELOCITY** equally effective as a family cruising yacht, an entertainment platform or a commercially operated vessel. Her RINA commercial classification further enhances her versatility and operational appeal.

Combining impressive performance, long-range capability, substantial guest accommodation and contemporary Italian design, **VELOCITY** represents a rare opportunity within the 50-metre market - a yacht capable of delivering both the excitement of a sport yacht and the practicality of a true long-range cruiser.
