T54

Building on the success of the highly acclaimed T52, the **T54** introduces a new vision of contemporary superyacht living. Designed by Francesco Paszkowski Design, this 54-metre steel yacht combines timeless Italian elegance with increased interior volume and innovative architectural solutions that create a more open, natural and comfortable way of living at sea.

The entire project has been conceived around how owners truly spend their time on board. Rather than separating indoor and outdoor areas, every space flows seamlessly into the next, allowing the interior, exterior decks and surrounding seascape to feel like one continuous environment. At the heart of the design is an exceptional three-level beach club, transforming the stern into a true waterfront destination. Lounge areas, an infinity pool, spa facilities, a fully equipped gym and direct access to the sea come together to create a space where swimming, relaxation, socialising and wellness naturally become part of the daily rhythm on board.

Special attention has been given to the owner's experience. The full-beam owner's suite is positioned forward on the main deck and enjoys direct access to a private ocean-view veranda. This exclusive outdoor retreat offers a level of privacy rarely found on a yacht of this size, creating a seamless extension of the owner's living space and a constant connection with the sea.

Spanning 146 square metres, the sundeck is far more than an upper deck - it is a fully fledged social and leisure destination. Designed with flexibility in mind, the layout can be customised to suit the owner's lifestyle, whether hosting large gatherings, entertaining guests or enjoying quiet family time in complete comfort.

The yacht's advanced hybrid propulsion system has been developed not only to improve efficiency but also to transform the onboard experience itself. Reduced noise, lower vibration levels and the ability to cruise in electric mode create a quieter, more relaxing atmosphere, allowing guests to feel even more connected to the surrounding sea and enjoy a more refined way of travelling.
